EXAMINER'S AMENDMENT

1. The application has been amended as follows:

18. (amended) A wind powered electrical generation system comprising:

a tower including a vertical elevator, the vertical elevator having a track and a carriage configured to move along the track; and

a wind powered generator configured to be connected to the carriage, the wind powered generator including a plurality of airfoils and an electric generator;

wherein the wind powered generator can be removably placed within the carriage after the tower has been erected and lifted vertically with the carriage to position the wind powered generator at a top of the tower; and

wherein the wind powered generator can be removed from within the carriage after the carriage has been lowered; and

wherein the carriage includes a pivot ring configured to accept the wind powered generator therein; and

the pivot ring includes a plurality of roller bearings configured to accept a portion of the wind powered generator thereon, thereby allowing the wind powered generator to rotate.

Cancel claim 24.

39. (amended) A wind powered generator comprising:

a housing;

a rod configured to rotate within the housing;

at least six spars connected to the rod and extending radially therefrom;

Art Unit: 2834

an airfoil connected to each of the spars at a location distal the rod; and
a generator located upwind of the spars and interconnected to the rod;
wherein the spars and the rod will rotate as wind passes the airfoils, thereby
powering the generator; and
a vertical leg connected to the housing;
wherein the housing is connected to an end of the vertical leg at a position off
center from an axis of the vertical leg.

Cancel claim 42.
